### 2. Hazard(s) identification

| Physical hazards | Flammable aerosols                              | Category 1                  |
|------------------|---|-----------------------------|
| Health hazards   | Serious eye damage/eye irritation               | Category 2A                 |
|                  | Reproductive toxicity                           | Category 1                  |
|                  | Specific target organ toxicity, single exposure | Category 3 narcotic effects |

#### Label elements

### **Mixtures**

| Chemical name                     | Common name and synonyms | CAS number | %       |
|-----------------------------------|--------------------------|------------|---------|
| Acetone                           |                          | 67-64-1    | 30 - 60 |
| Ethyl Alcohol                     |                          | 64-17-5    | 15 - 40 |
| Isobutane                         |                          | 75-28-5    | 10 - 30 |
| Propane                           |                          | 74-98-6    | 10 - 30 |
| Butyl Benzyl Phthalate            |                          | 85-68-7    | 0.1 - 1 |
| Mineral Spirits                   |                          | 8052-41-3  | 0.1 - 1 |
| Other components below reportable | levels                   |            | 10 - 30 |

Other components below reportable levels

All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

### 4. First-aid measures

| Inhalation   | Remove victim to fresh air and keep at rest in a position comfortable for breathing. Call a POISON CENTER or doctor/physician if you feel unwell.   |
|--|---|
| Skin contact   | Wash off with soap and water. Get medical attention if irritation develops and persists.  |
| Eye contact  | Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention.  |
| Ingestion  | In the unlikely event of swallowing contact a physician or poison control center. Rinse mouth.  |
| Most important<br>symptoms/effects, acute and<br>delayed                     | May cause drowsiness and dizziness. Headache. Nausea, vomiting. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision.   |
| Indication of immediate<br>medical attention and special<br>treatment needed | Provide general supportive measures and treat symptomatically. Keep victim under observation.<br>Symptoms may be delayed.   |
| General information  | IF exposed or concerned: Get medical advice/attention. If you feel unwell, seek medical advice (show the label where possible). Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves. Show this safety data sheet to the doctor in attendance. |
| 5. Fire-fighting measures  |   |

#### Alcohol resistant foam. Powder. Carbon dioxide (CO2). Suitable extinguishing media Do not use water jet as an extinguisher, as this will spread the fire. Unsuitable extinguishing media Contents under pressure. Pressurized container may explode when exposed to heat or flame. Specific hazards arising from During fire, gases hazardous to health may be formed. the chemical Special protective equipment Firefighters must use standard protective equipment including flame retardant coat, helmet with face shield, gloves, rubber boots, and in enclosed spaces, SCBA. and precautions for firefighters Move containers from fire area if you can do so without risk. Containers should be cooled with Fire fighting water to prevent vapor pressure build up. For massive fire in cargo area, use unmanned hose equipment/instructions holder or monitor nozzles, if possible. If not, withdraw and let fire burn out. Use standard firefighting procedures and consider the hazards of other involved materials. Move Specific methods containers from fire area if you can do so without risk. In the event of fire and/or explosion do not breathe fumes. Extremely flammable aerosol. General fire hazards

### 6. Accidental release measures

| Personal precautions,<br>protective equipment and<br>emergency procedures | Keep unnecessary personnel away. Keep people away from and upwind of spill/leak. Wear appropriate protective equipment and clothing during clean-up. Avoid breathing mist or vapor. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ventilate closed spaces before entering them. Local authorities should be advised if significant spillages cannot be contained. For personal protection, see section 8 of the SDS.  |
|---|---|
| Methods and materials for containment and cleaning up                     | Refer to attached safety data sheets and/or instructions for use. Stop leak if you can do so without risk. Move the cylinder to a safe and open area if the leak is irreparable. Use water spray to reduce vapors or divert vapor cloud drift. Eliminate all ignition sources (no smoking, flares, sparks, or flames in immediate area). Keep combustibles (wood, paper, oil, etc.) away from spilled material. Cover with plastic sheet to prevent spreading. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water. |
|   | Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination. For waste disposal, see section 13 of the SDS.   |

| Environmental precautions                                       | Avoid discharge into drains, water courses or onto the ground.   |
|---|--|
| 7. Handling and storage   |  |
| Precautions for safe handling                                   | Obtain special instructions before use. Do not handle until all safety precautions have been read<br>and understood. Pressurized container: Do not pierce or burn, even after use. Do not use if spray<br>button is missing or defective. Do not spray on a naked flame or any other incandescent material.<br>Do not smoke while using or until sprayed surface is thoroughly dry. Do not cut, weld, solder, drill,<br>grind, or expose containers to heat, flame, sparks, or other sources of ignition. All equipment used<br>when handling the product must be grounded. Do not re-use empty containers. Avoid breathing<br>mist or vapor. Avoid contact with eyes. Pregnant or breastfeeding women must not handle this<br>product. Should be handled in closed systems, if possible. Use only in well-ventilated areas. Wear<br>appropriate personal protective equipment. Observe good industrial hygiene practices. |
| Conditions for safe storage,<br>including any incompatibilities | Level 3 Aerosol.<br>Store locked up. Pressurized container. Protect from sunlight and do not expose to temperatures<br>exceeding 50°C/122 °F. Do not puncture, incinerate or crush. Do not handle or store near an open<br>flame, heat or other sources of ignition. This material can accumulate static charge which may<br>cause spark and become an ignition source. Store away from incompatible materials (see Section<br>10 of the SDS).   |

### 8. Exposure controls/personal protection

# Occupational exposure limits

| Components                         | Туре | Value    |  |
|------------------------------------|------|----------|--|
| Acetone (CAS 67-64-1)              | STEL | 500 ppm  |  |
|                                    | TWA  | 250 ppm  |  |
| Ethyl Alcohol (CAS 64-17-5)        | STEL | 1000 ppm |  |
| Isobutane (CAS 75-28-5)            | STEL | 1000 ppm |  |
| Mineral Spirits (CAS<br>8052-41-3) | TWA  | 100 ppm  |  |

### Canada. Alberta OELs (Occupational Health & Safety Code, Schedule 1, Table 2)

| Components                         | Туре | Value      |  |
|------------------------------------|------|------------|--|
| Acetone (CAS 67-64-1)              | STEL | 1800 mg/m3 |  |
|                                    |      | 750 ppm    |  |
|                                    | TWA  | 1200 mg/m3 |  |
|                                    |      | 500 ppm    |  |
| Ethyl Alcohol (CAS 64-17-5)        | TWA  | 1880 mg/m3 |  |
|                                    |      | 1000 ppm   |  |
| Mineral Spirits (CAS<br>8052-41-3) | TWA  | 572 mg/m3  |  |
|                                    |      | 100 ppm    |  |
| Propane (CAS 74-98-6)              | TWA  | 1000 ppm   |  |

## Canada. British Columbia OELs. (Occupational Exposure Limits for Chemical Substances, Occupational Health and Safety Regulation 296/97, as amended)

| Other | Wear suitable protective clothing. Use of an impervious apron is recommended. |
|-------|---|

**Respiratory protection** Chemical respirator with organic vapor cartridge and full facepiece.

**Thermal hazards** Wear appropriate thermal protective clothing, when necessary.

General hygiene<br/>considerationsObserve any medical surveillance requirements. When using do not smoke. Always observe good<br/>personal hygiene measures, such as washing after handling the material and before eating,<br/>drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove<br/>contaminants.

### 9. Physical and chemical properties

Appearance

| Liquid.                      |
|------------------------------|
| Aerosol.                     |
| Not available.               |
| 95.6 °F (35.33 °C) estimated |
|                              |

| Flash point                                | -245.2 °F (-154.0 °C) estimated |

| Flammability limit - lower<br>(%)          | 2.8 % estimated                 |
| Flammability limit - upper<br>(%)          | 12 % estimated                  |
| Explosive limit - lower (%)                | Not available.                  |
| Explosive limit - upper (%)                | Not available.                  |
| Vapor pressure                             | Not available.                  |
| Vapor density                              | Not available.                  |
| Relative density                           | Not available.                  |
| Solubility(ies)                            |                                 |
| Solubility (water)                         | Not available.                  |
| Partition coefficient<br>(n-octanol/water) | Not available.                  |
| Auto-ignition temperature                  | 784.49 °F (418.05 °C) estimated |
| Decomposition temperature                  | Not available.                  |
| Viscosity                                  | Not available.                  |
| Other information                          |                                 |
| Explosive properties                       | Not explosive.                  |
| Flammability class                         | Flammable IA estimated          |
| Heat of combustion                         | 27.46 kJ/g estimated            |
| Oxidizing properties                       | Not oxidizing.                  |
| Percent volatile                           | 96.69 % estimated               |
| Specific gravity                           | 0.651 estimated                 |
| VOC (Weight %)                             | 93.28 % estimated               |
|  |                                 |

### 10. Stability and reactivity

| Reactivity                          | The product is stable and non-reactive under normal conditions of use, storage and transport. |
|-------------------------------------|---|
| Chemical stability                  | Material is stable under normal conditions.   |
| Possibility of hazardous reactions  | Hazardous polymerization does not occur.  |
| Conditions to avoid                 | Avoid temperatures exceeding the flash point. Contact with incompatible materials.            |
| Incompatible materials              | Strong oxidizing agents. Nitrates. Fluorine. Chlorine.  |
| Hazardous decomposition<br>products | No hazardous decomposition products are known.  |
|                                     |   |

### 11. Toxicological information

### Information on likely routes of exposure

| Inhalation   | May cause drowsiness and dizziness. Headache. Nausea, vomiting.   |  |
|--|---|--|
| Skin contact   | No adverse effects due to skin contact are expected.  |  |
| Eye contact  | Causes serious eye irritation.  |  |
| Ingestion  | Expected to be a low ingestion hazard.  |  |
| Symptoms related to the physical, chemical and toxicological characteristics | May cause drowsiness and dizziness. Headache. Nausea, vomiting. Severe eye irritation. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. |  |

### 12. Ecological information

Ecotoxicity

The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

| Components             |                 | Species   | Test Results                |
|------------------------|-----------------|---|-----------------------------|
| Acetone (CAS 67-64-1   | 1)              |   |                             |

| Mineral Spirits                         | 3.16 - 7.15 |  |

| Partition coefficient n-o                | octanol / water (log Kow)   |
|--|---|
| Propane                                  | 2.36  |
| Mobility in soil                         | No data available.  |
| Other adverse effects                    | No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.   |
| 13. Disposal consideration               | ns  |
| Disposal instructions                    | Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Contents under pressure. Do not puncture, incinerate or crush. Dispose of contents/container in accordance with local/regional/national/international regulations. |
| Local disposal regulations               | Dispose in accordance with all applicable regulations.  |
| Hazardous waste code                     | The waste code should be assigned in discussion between the user, the producer and the waste disposal company.  |
| Waste from residues / unused<br>products | Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).  |
| Contaminated packaging                   | Since emptied containers may retain product residue, follow label warnings even after container is emptied. Empty containers should be taken to an approved waste handling site for recycling or disposal. Do not re-use empty containers.              |
| 14. Transport information                |   |
